Company Overview

D3 Technologies was founded May 5, 1982, and has been providing quality services for over forty years.

Core Capabilities

Engineering

- Avionics software and hardware development
- Critical structures
- Reliability-centered maintenance (RCM)
- Flight-control systems
- Structural engineering
- Design stress and finite element analysis
- Tool design
- Hydraulic and mechanical subsystems

Information Technology

- Configuration control/management
- Server maintenance/updates
- Information systems security
- Cyber security

Program Support

- Logistics
- Business financial analysis
- Program management

Why us

- Proven history of quality partnership with the Government over its 40-year history
- Experienced veterans in applying customer procedures and standards to generate the highest quality aerospace products and services in the most cost-efficient manner
- Provides support services to supplement the technical products and services to improve overall quality, timeliness, and efficiency

Contract Vehicles

SeaPort NXG MAC N0017819D7468

Current Past Performance

Prime on Department of Defense (Navy) contract for engineering services

N68520-23-F-3000, value of \$55 million

Under this contract D3 provides engineering, logistical, and program support in FST Program Operations, Critical Structures Service Life Extension Program (SLEP), Production Liaison, Maintenance Readiness, Avionics, Mechanical Subsystems, Support Equipment, Materials Engineering, and all other technical services associated with FRCSW engineering, logistics, and Research, Development, Test and Evaluation (RDT&E) Information Technology (IT) operations.

Primary NAICS

- 541330 – Engineering Services
 - 336411 – Aircraft Manufacturing
 - 336413 – Other Aircraft Parts and Auxiliary Equipment Manufacturing
 - 541340 – Drafting Services
-
